SUMMARY

A tech specialist with 3 years of experience flying drones for professional work. I also build games, websites, and use Python to automate tasks.

SKILLS

- **Coding:** Python, C#, JavaScript, HTML, CSS
 - **Game Making:** Unity, Unreal Engine
 - **Web Making:** Simple Websites, Responsive Design
 - **Drone Work:** Drone Piloting, Data Collection, Thermal (Heat) Cameras, Night Flying, Site Inspections (Oil & Gas, Agriculture)
-

EXPERIENCE

Drone Pilot

Jan 2021 – 2025

I fly drones to collect important data for companies in farming and oil & gas.

- Used drones with thermal (heat) and drone's cameras to check for leaks and damage on oil & gas sites.
 - Flew automated drone missions over farms to check crop health with special cameras.
 - Experienced in flying drones safely at night to perform heat-based inspections.
 - Handled the full process: planned flights, collected data, and made sure the information was good and ready for use.
-

PROJECTS

Game Development

- I build games using Unity (C#) and Unreal Engine.
- I create the gameplay, character AI, and level designs.
- I build simple websites that responsive on any screen size using HTML, CSS, and JavaScript.

Python Scripting

- I write Python scripts to automate tasks.

EDUCATION

Diploma in Information Technology Kemuda

Institute | 2018
